

NOTIFICATION SYSTEMS ASSESSMENT

MITIGATING RISK AND SAVINGS LIVES

HELPING CREATE SAFER SCHOOLS

A FOUNDATION FOR SCHOOL SAFETY

The Notification Systems Assessment by NIC Partners is designed to evaluate and improve the effectiveness of audible announcements on school campuses. Ensuring that students, faculty, and staff can receive crucial information in a timely manner during emergencies is vital for maintaining safety and security.

Campus safety is non-negotiable. We understand how important it is to stay ahead of technological advancements so that we can protect your students from all threats, whether over the web or on your property.

Our comprehensive assessment identifies potential issues with your existing notification system and provides recommendations to enhance its performance. Here are ways our assessment helps you becoming prepared:

Uncover hidden risks: Many districts are unaware of notification system issues until they face an actual emergency.

Meet safety standards: Notification systems must measure 15 dB louder than surrounding noise levels, and adapt to different environments (e.g., indoor hallways, outdoor campuses, basketball courts).

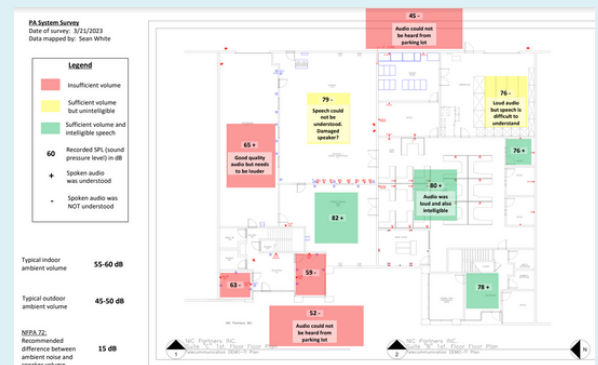

Stay current: Systems older than five years may not meet current safety standards and requirements.

Improve response: Efficient communication during emergencies is crucial, and often the first aspect investigated after an incident.

WHAT TO EXPECT

When you choose to work with NIC Partners for your Notification Systems Assessment, you can expect:

- A thorough evaluation of your current notification system, identifying areas where it may not meet safety standards or ADA requirements.
- Recommendations for upgrades or improvements to enhance the effectiveness of your notification system, ensuring everyone on campus can receive timely and accurate information during emergencies.
- A detailed report that can be presented to your school board to demonstrate the need for action.
- Assistance with upgrading your communication system, if desired, and a final assessment to confirm that all improvements have been successfully implemented.

20+ YEARS EDUCATION IT EXPERIENCE

Working with 65+ Southern California school districts and higher education institutions over 20+ years, NIC Partners has gained the experience and expertise to provide top-of-the-line digital and physical security. Two-thirds of our clients are K-12 or higher education organizations-so we understand the challenges unique to your industry.
